

# 20/20 Unhappy Patients Can Be Puzzling Hyperosmolarity May Be the Missing Piece

**Eric D. Donnenfeld, MD**

“I get asked, ‘how important is osmolarity testing in modern cataract-refractive surgery?’ And my response is, ‘how important is quality of vision for your patient outcomes?’”

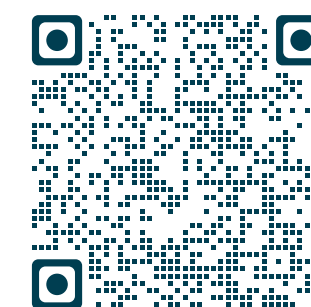

## Did you know that hyperosmolarity...

-  ...creates **light scatter** equivalent to a grade 2-3 cataract?<sup>1</sup>
-  ...may result in **>1.0D refractive miss** in 1 out of 10 patients?<sup>2</sup>
-  ...results in **7x the number of dissatisfied** patients following cataract surgery?<sup>2</sup>
